Fri, 11 Jan 2019 17:28:00 GMT matrices and tensors in physics pdf - In mathematics, a matrix (plural: matrices) is a rectangular array of numbers, symbols, or expressions, arranged in rows and columns. For example, the dimensions of the matrix below are 2 × 3 (read "two by three"), because there are two rows and three columns: Fri, 11 Jan 2019 20:55:00 GMT Matrix (mathematics) - Wikipedia - This table shows important examples of tensors on vector spaces and tensor fields on manifolds. The tensors are classified according to their type (n, m), where n is the number of contravariant indices, m is the number of covariant indices, and n + m gives the total order of the tensor.
